

ContagionGrid — Containment Report

City: Lucknow | Disease: DENGUE | Origin: Hazratganj

Initial Cases	Peak Zone	Total Zones	Red Zones
25	Aminabad	8	3

Immediate Actions

- Deploy rapid response teams to Hazratganj and Aminabad for case investigation and immediate source reduction.
- Alert all public and private hospitals in Lucknow to prepare for increased dengue patient load, ensuring availability of beds, testing kits, and IV fluids.
- Launch a city-wide public awareness campaign via media, local leaders, and community health workers on dengue symptoms, prevention (e.g., preventing water stagnation), and seeking early medical help.
- Activate an emergency control room for real-time data monitoring, resource allocation, and inter-departmental coordination.
- Initiate immediate large-scale vector control operations, beginning with the red zones, to include adult mosquito control (fogging) and larval control (source reduction and larvicides).

Containment Zones

Aminabad — RED

- Mandatory daily fogging
- Intensive larval source reduction drives
- Closure of non-essential markets
- Ban on large public gatherings
- Door-to-door surveillance for breeding sites

Reason: Highest projected cases in 72 hours.

Hazratganj — RED

- Mandatory daily fogging
- Intensive larval source reduction drives
- Closure of non-essential markets
- Ban on large public gatherings
- Door-to-door surveillance for breeding sites

Reason: Origin zone and second highest projected cases in 72 hours.

Chowk — RED

- Mandatory daily fogging
- Intensive larval source reduction drives
- Closure of non-essential markets
- Ban on large public gatherings
- Door-to-door surveillance for breeding sites

Reason: Very high projected cases in 72 hours, dense population.

Alambagh — ORANGE

- Mandatory alternate-day fogging
- Targeted larval source reduction drives
- Enhanced public awareness campaigns

Reason: High projected cases, significant potential for spread.

Aliganj — ORANGE

- Mandatory alternate-day fogging
- Targeted larval source reduction drives
- Enhanced public awareness campaigns

Reason: High projected cases, requires strong intervention.

Rajajipuram — ORANGE

- Mandatory alternate-day fogging
- Targeted larval source reduction drives
- Enhanced public awareness campaigns

Reason: High projected cases, close monitoring needed.

Gomti Nagar — YELLOW

- Weekly fogging
- General public awareness
- Passive surveillance for breeding sites

Reason: Moderate projected cases, focus on prevention and monitoring.

Indira Nagar — YELLOW

- Weekly fogging
- General public awareness
- Passive surveillance for breeding sites

Reason: Lowest projected cases, continuous monitoring and basic prevention.

Resource Deployment

Zone	Doctors	Testing Kits	Ambulances
